DETAILED ACTION

Allowable Subject Matter

1. Claims 3-22 and 24-55 are allowed.

The following is an examiner's statement of reasons for allowance: The prior art of record fails to teach or make obvious the steps of or means for **"detecting a change in the link, wherein the change produces altered connection type characteristics and advertising the altered connection type characteristics"**, when the detecting and advertising are considered within the specific structure of the method recited in claims 3 and 35 or the device recited in claim 24. The prior art of record fails to teach or make obvious the steps of or means for **"comparing the plurality of parameters with a table that stores network parameters to produce a first routing path to the receiving party, wherein the network parameters include links within the network and corresponding connection type characteristics capabilities for the links"**, when the comparing is considered within the specific structure of the method recited in claims 15 and 47 or the device recited in claim 29. The prior art of record fails to teach or make obvious the steps of or means for **"compiling connection type characteristics for a plurality of links within the network to produce a characteristic data set, wherein selecting the routing path further comprises selecting the routing path using the characteristic data set, wherein selecting the routing path further comprises comparing characteristics of a connection request with the characteristic data set, wherein the routing path is provided in response to the connection request, wherein compiling further comprises compiling the**
